1.2 PRINCIPAL PURPOSE OF THE ISSUE AND FUNDING ARRANGEMENTS

The principal purpose of the Issue is to strengthen the Company's financial position and support its medium-term operational and growth objectives. The proceeds will primarily be utilized to enhance production efficiency, improve infrastructure, modernize plant and machinery, ensure compliance with quality and safety standards, and adequately fund the Company's working capital requirements.

The capital expenditure component of the Right Issue is aimed at addressing operational bottlenecks, improving productivity, enhancing product quality, and supporting sustainable operations through targeted civil works, automation, and replacement or upgrading of critical machinery. The working capital portion is intended to provide liquidity support for procurement of raw materials, inventory management, and smooth execution of day-to-day business operations.

The proceeds from the Issue will be deposited in a designated bank account monitored by the Audit Committee to strengthen governance.

Purpose of Issue	Proceeds Utilization in Rs.	% Right Issue Proceeds
A. Civil Works	Rs. 95 million	19%
B. Renovation, Machinery Replacement & Process Improvements	Rs. 140 million	28%
C. Working Capital Requirements	Rs. 265 million	53%

[A]. Civil Works:

The proposed civil works investment of PKR 95 million is intended to address critical infrastructure gaps across key production and storage areas, including flooring upgrades, replacement of aging raw-material sheds, and essential building repairs. These improvements are required to ensure safe and hygienic manufacturing conditions, protect product quality, reduce operational disruptions, and support reliable, efficient production in line with regulatory and operational standards.

5		Building Repair Work (leakages, gaps)	14	Ravi Construction	Repair	Pakistan	Jun-26	Nov-26
		Total Civil Work:	95					

[B]. Renovation, Machinery Replacement & Process Improvements

A portion of the Rights Issue proceeds will be utilized for quality and process-stabilization initiatives aimed at improving product consistency, reliability of critical utilities, and control over key manufacturing processes. These investments are intended to reduce process variability, enhance compliance with quality and food-safety standards, and ensure stable and efficient production, thereby supporting sustainable gross margins and customer confidence.

The remaining allocation will be directed towards productivity improvements, debottlenecking of critical production lines, essential maintenance upgrades, and safety enhancements. These measures are designed to improve throughput, reduce operational downtime, enhance workplace safety, and strengthen overall manufacturing efficiency, supporting long-term operational resilience and cost optimization.

5. RISK FACTORS

5.1 RISK ASSOCIATED WITH THE RIGHT ISSUE

Undersubscription Risk

The Right Issue of the Company is being carried out at a price which is less than the current share price in the market and hence there is no major investment risk associated with the Right Issue. The substantial shareholder and directors of the Company have confirmed that they shall subscribe to (or arrange the subscription of) their respective right entitlements, while the balance portion of the Right Issue will be underwritten in accordance with the applicable laws. There is a risk that the right issue may get undersubscribed due to lack of interest from shareholders of the Company.

⁵ These may be subscribed through persons arranged by the said directors as permitted under the Regulations.

⁶ CCL's shareholding post issue shall increase as Syed Mohammad Mehdi Mohsin has arranged its subscription of entitlement with CCL holding to subscribe their portion on its behalf. Therefore, their shareholding shall be diluted.

⁷ Includes Entitlement of Shares to Mehdi allocated to CCL Holdings by the discretion of Board

5.2 RISKS ASSOCIATED WITH ISSUER

Internal Risk Factors

a) Operational Risk

Operational risk summarizes the uncertainties a business faces when it attempts to conduct its day-to-day business activities specifically in relation to plant operation. It can result from breakdowns in internal procedures, people and systems.

A high turnover ratio of skilled staff, disruption in the Company's supply chain or inappropriate planning could be a major determinant to operational risk for the Company.

The Company is mitigating operational risk by implementing staff retention initiatives, including training and competitive benefits, to address high turnover. Additionally, the Company is adopting a diversified supply chain planning process and implementing robust strategies to counter disruptions in the supply chain.

b) Procurement Risk

As associated in a business with dependency on wide range of raw materials including seasonal fruits & Vegetables, it is crucial to be cognizant of the inherent procurement risks associated. The sector is particularly susceptible to raw material price fluctuations. Additionally, the volatility in currency exchange rates can impact on the cost of imported packing materials.

Our commitment to transparency involves acknowledging and mitigating these risks through proactive procurement strategies, supplier diversification and diligent monitoring of market dynamics.

c) Credit risk

Credit risk represents the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Credit risk arises from amounts receivable from customers of the Company, deposits with banks and other receivables.

The Company manages credit risks inter alia by setting credit limits in relation to individual customers and by selling on advance payment basis for select customers. Consequently, the Company believes that it is not exposed to any major concentration of credit risk.

d) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities.

The Company manages liquidity risk by maintaining sufficient cash and the availability of funding through maintaining adequate cash balances, ensuring availability of committed credit facilities, monitoring cash flow forecasts on a regular basis and maintaining relationships with multiple financial institutions

These measures help ensure that the Company has sufficient liquidity to meet its operational and financial commitments.

e) Risk of Non-compliance with Regulations of SECP and PSX

In the event of non-compliance with any regulatory requirements of SECP or PSX, the Company may be placed on the defaulter segment of PSX which may potentially hamper trading in the Company's shares, leading to potential suspension in trading of its shares as well as delisting.

To mitigate the risk of non-compliance with SECP and PSX regulations, the Company has established an internal compliance framework, engages legal counsel for ongoing guidance, continuously monitoring regulatory changes

and maintaining open communication with regulatory bodies. These measures collectively aim to ensure adherence to regulatory requirements.

b) External Risk Factors

a) Business Risk

Business risk is the possibility of the Company reporting lower than anticipated profits or loss due to factors such as:

- Increase in input costs such as raw materials
- Increase in conversion / utility costs

The Company is actively following strategies to mitigate business risk, including supplier diversification, cost predictability through analytics and maintaining robust government relations.

b) Foreign Currency risk

Currency risk is the risk that the fair value or future cash flow of a financial instrument will fluctuate because of changes in foreign exchange rates. Currency risk arises mainly from future commercial transactions or receivables and payables that exist due to transactions in foreign currencies.

The Company is exposed to foreign exchange risk arising from currency value fluctuations, primarily with respect to the USD, EU, AED, and RMB.

c) Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in the market interest rates. When interest rates are high, borrowing costs increase, making it more expensive for the Company to finance its operations. This can lead to reduced business spending, lower economic growth, and decreased profitability. It also discourages business investment as financing new projects becomes more expensive.

The Company constantly monitors market interest rates and employs strategies to mitigate interest rate risk associated with short-term borrowings on variable rates. In light of the same, the Company intends to utilize the proceeds from the Right Issue to finance its working capital requirements, including with the intention of reducing its reliance on short-term borrowings. This approach aims to ensure cost effective financing and minimize the impact on business spending during period of high interest rates.

C- Additional Risk Factors

a) Capital Risk Management

The Company's objectives in managing capital are to ensure the Company's ability to continue as a going concern so that it can continue to provide returns to shareholders and benefits for other stakeholders while maintaining an optimal capital structure to reduce the cost of capital. The Company finances its operations through equity, borrowings and management of working capital with a view to maintaining an appropriate balance between the various sources of finance to minimize risk and cost. The Company is not exposed to any externally imposed capital requirement. As a public limited company, it complies with the regulatory requirements outlined in the Companies Act, 2017.

Profitability

The Company reported an after-tax profit of **PKR 1,673,534** for **FY 2025**, compared to **PKR 456,242,216** in **FY 2024**, indicating a decline particularly due to prior year inclusion of PKR 357.0 million of one-off other income from a land sale. Excluding this exceptional item, underlying operating profit in FY2024 was PKR 99.0 million.

NOTE: IT IS STATED THAT TO THE BEST OF OUR KNOWLEDGE AND BELIEF, ALL MATERIAL RISK FACTORS HAVE BEEN DISCLOSED AND THAT NOTHING HAS BEEN CONCEALED IN THIS RESPECT.
